MAGIC JACKPOT™

UNIVERSAL JACKPOT SYSTEM

This newest Jackpot system development by Playsystem is completely different that those Jackpot solutions which are offered by other companies. With this product we focus onto those customers too who operates many different machines from various manufacturers. We left the trend that a Jackpot system needs to have any communication with host machine in order to have a Jackpot system for the players. MAGIC JACKPOT SYSTEM IS UNIVERSAL needs only stake electromechanical meter's installed in a machine.

- A Master card controls system
- A slave interface / machine
- Easy to install
- RS 485 communication
